TRƯƠNG ÁI NGA

Fullstack Web Developer

+84 376 600 545 ainga01012004@gmail.com https://ainga2k4.vercel.app/ https://github.com/AiNga04

Summary

Fresher Full-Stack Developer with hands-on experience in Java, Spring Boot, Next.js, and TypeScript, including a Web Developer internship at FPT Software. Built and deployed full-stack applications with secure authentication, payment integration, and Docker-based deployment on AWS EC2.

Education

Ho Chi Minh City University of Technology and Education **2022 – 2026**
Major: Information Security GPA: 3.34/4.0

Skills

Programming Languages: Java, JavaScript, TypeScript.
Front-end: React.js, Next.js, HTML5, CSS3/SCSS, Tailwind CSS.
Back-end: Spring Boot, Spring Security, Node.js, NestJS.
Database & storage: PostgreSQL, MySQL, Redis.
Tools & Workflow: Git, Docker, Linux, AWS EC2, CI/CD, Postman, Agile/Scrum.

Experience

FPT Software Tp.Hồ Chí Minh **Jun 2025 - Sep 2025**
Web Developer (Internship)

- Developed backend features using Java and Spring Boot in a microservices-oriented environment.
- Implemented authentication and role-based authorization using Keycloak and RBAC.
- Worked with PostgreSQL and Docker during application development.
- Collaborated with team members in an Agile/Scrum environment to implement and maintain web application features.

Projects

Digital Rental - Secure Camera Rental Platform **Feb 5, 2026 - Present**
Fullstack Developer | Graduation Thesis

Technologies: Next.js, TypeScript, Spring Boot, PostgreSQL, Redis, MinIO, TanStack Query, Zustand, Docker, AWS EC2.

- Developed end-to-end rental workflows for equipment availability, deposits, device serial tracking, returns, and fee calculation.
- Managed server state with TanStack Query caching and authentication/loading state with Zustand.
- Implemented RBAC with Spring Security and E2EE encryption using ECDH, HKDF-SHA256, and AES-256-GCM.
- Integrated VNPay payments, FPT AI eKYC verification, and MinIO object storage.
- Built multi-stage Docker images with non-root execution and container health checks.
- Implemented CI/CD with GitHub Actions to automate Docker builds, Docker Hub pushes, and AWS EC2 deployment.

Zyna E-Commerce – Full-Stack Fashion E-Commerce Platform **Oct 28, 2025 – Mar 22, 2026**

Full-Stack Developer | Personal Project

Technologies: Java, Spring Boot, Spring Security, PostgreSQL, Redis, Next.js, TypeScript, TanStack Query, Zustand, Axios.

- Designed modular RESTful APIs for product management, inventory, checkout, orders, and shipping workflows.
- Implemented inventory validation and transaction management for consistent order processing.
- Secured APIs using Spring Security, JWT refresh-token rotation, Redis token blacklisting, and RBAC.
- Built Axios interceptors with a refresh-token queue to handle concurrent 401 responses.
- Managed server state with TanStack Query caching and auto-refetching, and UI state with Zustand.
- Integrated VNPay payment processing and Redis caching for backend data access.

- Backend: https://github.com/AiNga04/Be-Ecommerce

Other Projects

Fullstack & UI-focused projects: https://github.com/AiNga04?tab=repositories

- Movie Streaming Website - Responsive movie browsing UI with filtering features.
- Tech: HTML, SCSS, Bootstrap, JavaScript.
- Online Course Marketplace Website - Course listing interface with responsive Bootstrap layout and filtering sections.
- Wanderlust Travel Website - Travel landing page with destination sections and Tailwind CSS styling.

Professional Training & Honors

Professional Training

- Java Web Full-Stack Development – VTI Academy (Completed 84 training sessions)

Scholarships & Honors

- Power On Scholarship Recipient – Academic Years 2022–2023, 2023–2024, 2024–2025, 2025–2026
- Zhi Shan Foundation Scholarship Recipient (2018–2026)
- Pham Van Dong Scholarship Recipient – Academic Years 2024–2025, 2025–2026
- Tiep Suc Den Truong Scholarship – Tuoi Tre Newspaper (2022)
- Dong Hanh Scholarship Recipient – 44th Award Round (2022)
