TRƯƠNG ÁI NGA

Fullstack Web Developer

0376600545 ainga01012004@gmail.com https://ainga2k4.vercel.app/ Thủ Đức, Viet Nam

OBJECTIVE

Fullstack Web Developer with an Information Security background, focused on building responsive web applications, secure API flows, and reliable backend systems using React, Next.js, and Spring Boot.

EDUCATION

Ho Chi Minh City University of Technology and Education 2022 - 2026

Major: *Information Security*

Final-year student

SKILLS

Front-end	HTML, CSS/SCSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Ant Design, MUI, shadcn/ui
Back-end	Java, Spring Boot, Node.js, NestJS, RESTful APIs, JWT, RBAC
Security & Integration	AI eKYC, VNPay, MinIO, SMTP, Secure API Design, E2EE concepts
Other Skills	Git, Docker, PostgreSQL, Redis, Figma, Postman, Agile/Scrum, Teamwork, Problem-Solving

WORK EXPERIENCE

FPT Software Tp.Hồ Chí Minh Jun 2025 - Sep 2025

Web Developer (Internship)

- Developed backend features using Java Spring Boot in a microservices-oriented environment.
- Implemented authentication and authorization flows with Keycloak and RBAC.
- Worked with PostgreSQL, Docker, and Agile/Scrum practices during project development.

viec24h.vn Jun 2025 - Aug 2025

Frontend Developer (Freelance)

- Built responsive dashboard interfaces using React, Next.js, TypeScript, and Tailwind CSS.
- Integrated REST APIs and improved data loading flows with Axios and reusable UI components.
- Collaborated with clients to refine user flows and deliver practical dashboard features.

PROJECTS

Digital Rental - Secure Camera Rental Platform with AI eKYC and E2EE-Shield SDK Feb 5, 2026 - Present

Github: https://github.com/AiNga04/digital-rental

- **Website:** https://www.lenshub.shop/
- **Team Size:** 2 (Graduation thesis project)
- **Technologies:** Next.js, React, TypeScript, Tailwind CSS, Spring Boot, PostgreSQL, Redis, MinIO, VNPay, FPT AI eKYC
- Built a full-stack camera equipment sales and rental platform with customer, staff, admin, and super admin portals.
- Developed complete rental workflows including availability checking, device serial management, online payment, OTP-based contract signing, handover/return reports, deposits, and overdue/damage fee calculation.

- Integrated FPT AI eKYC with OCR, face matching, liveness detection, risk scoring, and admin approval for high-value equipment rentals.
- Designed and integrated E2EE-Shield SDK to encrypt sensitive JSON API payloads using ECDH, HKDF-SHA256, AES-256-GCM, nonce, timestamp, and Redis-backed session storage.
- Implemented RBAC, JWT authentication, audit logs, VNPay payment, MinIO file storage, email notifications, revenue dashboard, and Excel report export.
- Built responsive customer and admin UIs with product browsing, cart, checkout, order/rental tracking, and management dashboards.

Zyna E-Commerce Frontend Nov 25, 2025 - Mar 22, 2026

GitHub: https://github.com/AiNga04/Fe-Ecommerce

- **Team Size:** 1 (self-learning individual project)
- **Technologies:** Next.js 16, React 19, TypeScript, Tailwind CSS, TanStack Query, Zustand, Axios, Framer Motion
- Built a modern fashion e-commerce frontend using Next.js App Router with responsive UI and SSR optimization.
- Implemented role-based dashboards for Admin, Staff, Shipper, and Customers.
- Developed modules for product browsing, cart management, checkout, order tracking, and profile management.
- Integrated backend REST APIs with Axios, React Query caching, and JWT authentication handling.

Zyna E-Commerce Backend Oct 28, 2025 - Present

GitHub: https://github.com/AiNga04/Be-Ecommerce

- **Team Size:** 1 (self-learning individual project)
- **Technologies:** Java 17, Spring Boot 3, PostgreSQL, Redis, JWT, Docker, VNPAY API
- Built a RESTful backend system for a fashion e-commerce platform using Spring Boot with layered architecture.
- Implemented JWT authentication and RBAC authorization with Spring Security.
- Developed modules for products, orders, inventory, vouchers, and shipping workflows.
- Integrated VNPay payment gateway and Redis caching for performance and security.

SDK E2EE_SHIELD Sep 2, 2025 - Nov 26, 2025

GitHub: **https://github.com/AiNga04/E2EE_SHIELD**

- **Team Size:** 2 (graduation project)
- **Technologies:** Next.js, TypeScript, Spring Boot, ECDH, HKDF, AES-GCM, JWT, REST API
- Built a secure API communication layer implementing end-to-end encryption for web applications.
- Implemented ECDH key exchange and HKDF-based key derivation to generate AES-256-GCM session encryption keys.
- Developed a TypeScript SDK to encrypt/decrypt API requests automatically via Axios interceptors.
- Demonstrated secure communication between Next.js frontend and Spring Boot backend services.

Other Projects -

Fullstack & UI-focused projects: https://github.com/AiNga04?tab=repositories

- Movie Streaming Website — Responsive movie browsing UI with filtering features. Tech: HTML, SCSS, Bootstrap, JavaScript.
- Online Course Marketplace Website — Course listing interface with responsive Bootstrap layout and filtering sections.
- Wanderlust Travel Website — Travel landing page with destination sections and Tailwind CSS styling.

INTERESTS

- Exploring modern web technologies, secure application design, and developer tools.
- Designing clean, user-friendly interfaces and improving personal web projects.
